

PERSONA CIENCIA EMPRESA
UNIVERSITAT RAMON LLULL

IQS School of Engineering, integrated in Ramon Llull University in Barcelona, offers Bachelors in Chemistry, Chemical Engineering, Industrial Engineering, Biotechnology, Pharmacy and Biomedical Sciences, as well as Masters and PhD programs in science and engineering.

The Department of Analytical and Applied Chemistry, beyond its participation in teaching Bachelor's fundamental modules courses, is responsible for teaching Analytical Chemistry and related areas in bachelors and masters of IQS School of Engineering. IQS is currently looking for candidates starting on 2023-2024 academic year to fill the position of:

Professor in Analytical Chemistry (Bioanalysis)

Associate Professor to join the Department of Analytical and Applied Chemistry for teaching and developing research activities as well as other academic duties. Main job functions include:

- Teaching in the Analytical or Bioanalytical Chemistry area and other related courses in undergraduate and Master programs of IQS School of Engineering.
- Leading experimental laboratory teaching in the area of knowledge of Analytical Chemistry and other related areas of knowledge.
- Developing research in the priority topics included in IQS and Ramon Llull University scientific policy, integrating and coordinating with research activities of the Department of Analytical and Applied Chemistry.
- Actively participating in securing competitive research funding, establishing and participating in projects of technology transfer, and establishing internal collaborative research programs with other professors and researchers at IQS.
- Establishing and fostering international research collaborations.

Requirements:

- PhD in the field of Analytical Chemistry or Bioanalysis.
- Postdoctoral or industrial experience –preferably international– in the field of Analytical Chemistry and/or Bioanalysis.
- A record of publications in international journals and/or patents.
- Participation and/or leadership in competitive research projects will be considered.
- Proven experience in teaching at bachelor or master's level will be considered.
- Good level of English to be able to teach in this language.
- Accreditation of teaching and/or research activity by national evaluation agencies will be valuable, or having enough merits to obtain it.

Career opportunity:

- Development of an academic career with promotion to the different academic categories within Ramon Llull University rules.

To apply for this opportunity, send detailed CV: rrhh@iqs.url.edu indicating Ref. **Professor Analytical Chemistry**.
